Federal Action – Feedback

Action Ideas in Response to Climate Change

- National Security - instilling fear in people so that they want to make a change
- War on Climate Change, addressing this issue as a national crisis
- Creating corporate accountability: consequences for certain actions financially
- Privatization
- We need to set an example for what other developed nations should be like to live more sustainably
- They think that there is a greater responsibility for the United States in affecting change on this issue
