**IU Bloomington Events of Interest**

**New student group to prepare for conference: COLLEGE YOUTH IN GOVERNMENT**

Some IUB students are working on starting a student organization to prepare legislation, policy, or judicial arguments for this conference. College Youth in Government (YIG) is a 5-day program held at the YMCA Blue Ridge Assembly in Black Mountain, North Carolina from January 16-20. It incorporates all three branches of our government into one conference: legislative, judicial, and executive of which each delegate chooses to participate in only one for the duration of the conference. What makes this conference unique is that if legislation passes through the conference, it is then forwarded to Washington D.C. and the bill author is invited to meet his or her Congressional representatives and discuss their bill. There are also guest speakers that hail from all forms of the political spectrum. This is a program that is NOT just about debating; this is not another Forensics team. This is a model government of the United States and is unlike any conference that IU has participated in before. Contact Caroline Wallace at carewall@indiana.edu if you are interested in the group. [http://www.collegeyig.org/](http://www.collegeyig.org/)
The Undergraduate Scholar is Indiana University's student-run academic journal sponsored and published by the Hutton Honors College. We publish non-fiction essays of any length and from all disciplines, from art history to zoology. Each issue reflects our intellectual engagement with the political, social, moral, and aesthetic issues of both the past and present. Any undergraduate student at Indiana University is eligible for publication regardless of class standing or major. If you are interested, please submit your writing—whatever topic or length! Email your essay to undergraduate.scholar@gmail.com or visit http://www.indiana.edu/~uscholar/index.html.

Dean of SPEA John D. Graham will discuss how America’s poverty population, as defined by the federal government, has fared during the Great Recession (2007-9) and during the slow recovery period (2009 to the present). One of his surprising conclusions is that America’s poor may be at greater risk now because political support for the “safety net” may be diminishing faster than the economic recovery is operating to provide gainful employment opportunities that reduce rates of poverty.
