**PACE-C 210 Public Leadership, S&H, PACE core course requirement**

*Weinberg, 4:00-5:15 P.M., Mon/Wed, Ballantine 147*
Throughout American history, leaders and followers create change. What makes a public leader in America? Who are they and what impact do they have on democratic and civil society? This course looks at leadership through the lenses of theory and practice, providing opportunities for students: to analyze public leadership through readings, films, exercises and discussions; to consider and practice communication and behavioral skills; and to reflect on personal development as the next generation of public leaders. **PACE-C 211 Making Public Decisions, S&H, PACE core course requirement**

Napoli, 4:00-5:15 P.M., Tues/Thurs, Ballantine 147

Taxes? Immigration? Climate Change? Same-Sex Marriage? How do decisions on these and countless other major public issues get made in America? This course provides the answers by giving students an interdisciplinary introduction to public decision-making in the United States from the local community to the national capital. Students learn about the role of political institutions and civic organizations such as political parties, faith-based associations, neighborhoods groups, advocacy non-profits, legislatures, courts, administrative bureaus, and the media. They also learn the primary skills needed for effective engagement in political and civic discussion, deliberation, communication, advocacy and action. The course concludes by asking students to make individual and group decisions about a major issue facing Americans today.

**PACE-C 300 Issues in PACE: GOOD BEHAVIOR, BAD BEHAVIOR IN PUBLIC LIFE**

[counts as an 'inside the College' upper-level course for majors in the College and toward the PACE certificate as an upper-level elective; part of Themester 2012]

Libby & Bergonzi, 9:30-10:45 A.M., Tues/Thurs, Ballantine 140

This course will examine a variety of forms of public behavior ranging from social protest to civil disobedience to consumer boycotts to community deliberation/mediation. Using historical and contemporary examples from the United States, we will consider our assumptions and judgments of what constitutes good and bad behavior and the overlap with appropriate and inappropriate behavior and effective and ineffective behavior in public life by both individuals and groups. A few areas in the public domain—such as: electoral politics, the information commons, and environmental decisions—will ground our analysis of public behavior. Some questions that we will address in relation to these public spheres include: How has the political system created good and bad patterns of behavior? What is the relationship between anonymity and good and bad behavior in communication between citizens and the sharing of public knowledge? What are the relationships among good and bad behavior, effective behavior, and appropriate behavior? An important focus of our studies will be an examination of whether potential and actual conflict serves as a creative opportunity to approach divisive issues, choose behavior, and be effective as citizens. To that end, we will introduce theories, examples, and practices that can be used to make more effective behavioral choices as citizens, such as mediation and negotiation, active listening, democratic deliberation, cyber-advocacy, and the like. Each student will have multiple opportunities to contribute his or her own perceptions and values to the construction of knowledge in this course. Each student will be encouraged to develop his or her understanding of what constitutes good and bad behavior in American public life.
