7 2013-14 INTERNSHIP PROGRAM IN SUSTAINABILITY

The Academic Year Internship in Sustainability utilizes campus as a living-learning lab, enlisting students as researchers in investigating important questions facing our community, such as: How do the ways in which our campus operates and consumes resources affect the social, environmental and economic well-being of our community? How is our campus impact connected to more complicated global issues like climate change, resource scarcity and poverty? What opportunities do we have as individuals, institutions, communities, and governments to increase collective social, economic and economic health, and how do we best communicate these opportunities? How will we adapt and ensure all people have the ability to thrive in response to dynamic climate conditions and limitations on resources?
